## TechGeo PRO HDPE TXT 1.00 mm - GM13

TechGeo PRO HDPE TXT Geomembrane Series is manufactured by a Blown Film process which uses resins produced under world class quality controls and international standards.
The formulation of this geomembrane is composed of high molecular weight virgin resins and stabilized with the best additives on the market. As a result, it guarantees high durability and excellent mechanical properties and chemical compatibility.
TechGeo PRO HDPE TXT has an automatic and state-of-the-art texturing process by injection of nitrogen gas and follows international manufacturing guidelines established by GRI GM-13, recommendation developed by the Geosynthetic Research Institute (GRI).

[^0]:    (1) Carbon black dispersion for 10 different views: 9 in categories 1 and 2; 1 in category 3
    (2) Not recommended since the high temperature of the Standard OIT test produces an unrealistic result for some of the antioxidants in the UV exposed samples Obs: roll tolerable variation in width and length: $\pm 2 \%$
